Tester Senior Analyst

At Avanade, business and technology consulting isn't just your career…it's your passion. And that means more than just working with new innovations. It means using technology to solve business problems in ways that make a real difference to you, your customers, and the world.

At Avanade, we:

- Are passionate about pushing the limits of Microsoft technologies to help our customers achieve their goals
- Thrive on open dialogue and debate. We share best practices and solve problems through teamwork.
- Are committed to growth - as an organization and for each individual.

An experienced Tester Senior Analyst is needed to have Solid experience in SW test development with academic degree in Computer Science, Electrical Engineering or similar fields, and build a mission critical custom ASP.NET solution. The tester Analyst will own and account for all aspects of Testing including refining of the test strategy and approach, planning, estimating, process initiation, artifact review, artifact decomposition, test case review and defect tracking/resolution.

The tester Senior Analyst must gain a good understanding of the customer business needs for which he can count on the support of the team leads within the project team. The candidate has the ability to function within the framework of an existing Test Methodology as well as to coach and mentor other junior Test Staff.

Qualifications and requirements:

- Be able to pro-actively analyze current SW development test setup and suggest/ drive improvements
- Proven experience in developing test automation with proficient programming skills (in C/C++/Java/J2ME/Python)
